Mockup A

- I really like the color scheme overall, I feel like it allows for the different info/pictures to stand out
- I think the sections could have subsections possibly
    - You could have a long page with all the music
        - Maybe you could have a function where clicking "Music" takes you to an overall page, and a dropdown menu with each project will take you to the corresponding project on that overall "Music" page
    - You could have a page per major project
- Could you use a png of the 3 logo?

Mockup B

- I like the use of the quote in the beginning, I think it fits with the overall intent of the website
- The color scheme matches well with Coloring Book, but I feel like it might not fit the other projects as well because they all have different colors on the covers
- Could you use a png of the 3 logo?

For Next Time

- We settled on the Mockup A direction
    - I like the overall vibes so you can continue in that direction
- Nav Bar on all the pages
- Hamburger menu
- Multiple pages (like sub pages)
